Distribution Category UC-98

# Weekly Coal Production

Energy Information Administration  
Washington, D C

**Contains Supplementary Data**

Production for Week Ended:  
November 30, 1985

# Preface

## The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its

data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Kenneth Shanks, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

# Highlights

U.S. coal production in the week ended November 30, 1985, as estimated by the Energy Information Administration, totaled 13.59 million tons (bituminous coal and lignite, 13.52 million tons; Pennsylvania anthracite .06 million tons). This was 24.8 percent lower than the previous week, due to the Thanksgiving day holiday, and was 12.1 percent lower than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through November 30, 1985 was estimated at 815.43 million tons, 2.2 percent below the 833.35 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).

*Technical Note*  
*Census Export and Import Data*

Export and import data are obtained from the Bureau of the Census, U.S. Department of Commerce, where they are compiled monthly from documents filed with the U.S. Customs Service, as required by law.

Each coal shipment is reported in short tons with corresponding total dollar values. For export shipments, the f.a.s. export value is given; for import shipments, the Customs import value, c.i.f. import value, and f.a.s. import value are given. EIA converts all value data obtained from the Census Bureau to average price data by dividing the f.a.s. value by the quantity.

Some coal data obtained from the Census Bureau have been found to be misleading or incorrect, particularly where small quantities of coal are involved. The Energy Information Administration is initiating efforts to identify and correct these data. In the interim, certain data cells have been suppressed for publication purposes only: 1) average prices of \$200.00 per short ton or more; and 2) percent changes of 1,000 percent or more. Any future changes in methodology of computation or presentation of data will be documented at that time.

For reporting purposes, the month of exportation reflects the month in which the shipment leaves the United States; the month of importation generally is based on the month in which the U.S. Customs Service releases the merchandise to the importer. For both sets of data, however, there can exist a small carry-over from the actual month of exportation or importation to a subsequent month, usually the succeeding month. A number of factors in processing account for this, e.g., late receipt of a document for an end-of-month shipment, or rejection of a shipment by the computer due to failure to meet established edit criteria. These limitations should be considered when making comparisons.

# Need Information on Electric Power?

The Energy  
Information  
Administration  
has Data and  
Projections on:

- Production
- Consumption
- Prices
- Stocks of Fuels

A black and white photograph of a field with a utility pole in the background. The field is filled with dense, low-lying vegetation. In the background, a utility pole with cross-arms is visible against a light sky. The overall image has a high-contrast, grainy appearance.
